

# New Discovery Astounds Scientists

Scientists have found a shocking new discovery. You can view it in the *Lititz Museum of Science*. This discovery is explained by Justin Yhun “We have found a small rock containing a disk replaying every battle ever seen including ones in the future. This discovery blows most other ones out of the water, and changes our thinking about most historical events.”

Some people say that this is from the future, while others say this is a hoax. Either way, professionals say this is the discovery of the century **(or a great big lie!)**
